Essence

I am a Second-year Mathematics and Computer Science student at the Technion with a strong foundation in analytical thinking and algorithmic problem-solving. A former Intelligence Officer with extensive experience in managing complex projects in high-pressure operational environments. Seeking a software developer role to apply academic excellence and strategic leadership to deliver innovative and efficient technological solutions

Education

BSc. Mathematics and Computer Science, Technion University. 2025 - present

Expected Graduation: 2027.

GPA: 90.4

Last semester's GPA: 88.5

Related coursework: Data Structure, Introduction to Systems Programming,
Introduction to Computer Science, Introduction to Numerical Analysis.

Projects and Achievements

"MatamStory" Multiplayer Game

Designed and built a turn-based multiplayer game in C++ as part of the Systems Programming course. Implemented Object-Oriented Programming (OOP) principles, Polymorphism, and Design Patterns to manage game logic and characters.

Student Management System (AVL Trees)

Developed a dynamic system for managing students and courses using C++. Implemented complex data structures (AVL Trees) from scratch to meet strict efficiency requirements.

Technion Dean's List for Academic Excellence (spring 2025)

Yahalom Unit Excellence Award (2022 ceremony)

Skills

Programming languages: Python, C++, C

Fields of knowledge: Data Structures, Operating Systems, Algorithms, Object Oriented Programming, GIT.

Military service

Israeli Northern Command (Intelligence) 12/2017 - 05/2019

Engineered and executed comprehensive intelligence collection plans; managed unit-wide combat readiness and professional training programs.

Intelligence Lead for Tactical Operations (Judea & Samaria) 11/2019 - 11/2020

Directed the intelligence framework for counter-terrorism operations, coordinating with various security agencies to ensure mission success.

Intelligence Operations Commander (Gaza Sector) 11/2020 - 12/2021

Led the sector's intelligence hub (HML), directing real-time collection and tactical management during both routine (BATASH) and emergency operations.

Combat Engineering Unit for Special Operation - Yahalom (Gaza Sector) 12/2021 - 03/2023

Managed complex missions within a classified unit, requiring high-level strategic planning, execution, and extreme personal responsibility.
